

Dear Mr. Kai Olbertz and the Cashcontrol Kassensysteme GmbH Team,

I am writing to express my keen interest in the Software Developer position as advertised, Reference number: 10000-1197945263-S. As a Bachelor of Computer Science at Sabanci University poised to graduate in 2024, my academic and professional experiences have thoroughly prepared me for contributing innovative solutions and technical agility to the talented team at Cashcontrol Kassensysteme GmbH.

During my educational tenure, I have received a 75% scholarship for my academic excellence and have vested deep roots in practical applications, ranging from data structures to software development with projects such as Sahaya, which demonstrate my competency in both front and backend development.

My internships have vested me with hands-on experience in the core technologies used at Cashcontrol, particularly in C# and SQL. At Vodafone Telecommunication and Cmos Technology, I maintained and implemented APIs for various applications demonstrating my proficiency and adaptability in a professional setting. I have also taken pride in developing secure and efficient software solutions, marked by my work on the "Selfservis" project at Vodafone and numerous contributions at Webulos OG, including performing thorough testing phases using Selenium.

In addition to technical skills, I have excelled in a leadership role as the Debate Club Organization Manager at my university, showcasing my communication, management, and IT skills in hosting websites and managing teams; all skills which I believe match the spirit and dynamic of the Cashcontrol family.

I am profoundly attracted to the innovative working environment at Cashcontrol, particularly the prospect of utilising state-of-the-art touchless pay systems. Your commitment to a supportive team culture, personal development opportunities, and flexible working conditions resonate with my professional aspirations.

I am confident that my proactive attitude, technical aptitude, and commitment to continuous learning will allow me to contribute to Cashcontrol's mission. I am eager to discuss how my background, skills, and enthusiasm for software development can be an asset to your esteemed company.

Thank you for considering my application. I am looking forward to the opportunity to discuss how I can contribute to your team's success.

Warm regards,
Ahmethan Özcan
