

Dear Ms. Melanie Reuß, I am writing to express my interest in the Software Developer position with the Bundesamt für Seeschifffahrt und Hydrographie as advertised, reference code 20240105_9300. With a Bachelor of Computer Science on track for completion in 2024 from Sabanci University and practical experience gained through multiple internships, I am enthusiastic about the opportunity to contribute to the esteemed Zentralabteilung team. My academic background has equipped me with solid technical knowledge in Data Structures, Operating Systems, and Software and Mobile Development. I have honed my coding skills in languages such as C, C++, C#, Java, and Python, and have developed proficiency in JavaScript frameworks like ReactJS and React Native. During my internship at Vodafone Telecommunications, I played a pivotal role in the Selfservis project, where I was instrumental in automating scripts for distributed systems. My commitment to enhancing network operations via script automation and security integration honed my capacity to work effectively in complex IT environments. While interning at Cmos Technology, my tasks included maintaining APIs for multiple games and developing reusable components that significantly improved user interfaces and back-end functionality. This experience, alongside my tenure at Webulos OG in Austria, where I engaged in front-end and back-end development for various projects, has provided me with a robust understanding of the software development lifecycle and the Agile methodology. My commitment to continuous learning and improvement echoes the qualifications you seek, as does my experience with different programming environments and development projects, such as Rhomberg Sersa and the Bionic Reading App Mobile. I am confident that my skill set, combined with my adaptability and problem-solving capabilities, will make a valuable addition to the Bundesanstalt für Verwaltungsdienstleistungen team. As for my linguistic skills, I am a native Turkish speaker with an advanced proficiency in English, and I am actively working to enhance my German language skills, currently at the B2 competence level. I am inspired by the prospect of joining an organization with a reputation for being a family-friendly employer that embraces diversity and professional development. I am eager to contribute my thorough technical know-how and a proven track record of successful project outcomes to the MDZ23 Development team. Thank you for considering my application. I look forward to the opportunity to discuss how my skills, experience, and aspirations align with the needs of the Bundesanstalt für Verwaltungsdienstleistungen. Yours sincerely, Ahmethan Özcan
