EDUCATION

Bachelor of Computer Science, Sabancı University   Expected: 2024
Scholarship: Awarded a 75% scholarship for ranking in the top 6,000 in the national university entrance exam.
Relevant Coursework:

- Data Structures
- Operating Systems
- Software Development with Project: Sahaya
- Mobile Development

High School, Haydarpaşa High School   2015-2019

SKILLS

- **Technical Skills:** C, C++, C#, Java, JavaScript, MongoDB, Node.js, Python, ReactJS, React Native, Selenium, Sequelize, SQL, Strapi, Unity.
- **Language Skills:** Turkish (native), English (advanced).

EXPERIENCE

VBTS Script & Automation Intern   July 2023 - December 2023
Vodafone Telecommunication   *Istanbul, Turkey*

- Contributed to the "Selfservis" project, emphasizing the automation of scripts within distributed systems, ensuring enhanced network operations across various platforms.
- Participated in developing a fortified security framework by integrating a meticulous login system and implementing comprehensive operational logging, safeguarding data and enabling traceability of system interactions.
- Engaged in utilizing Agile development methodologies, facilitating iterative enhancements, thorough testing phases, and adaptive strategies to effectively realize robust network management functionalities.

Software Developer Intern   March 2023
Cmos Technology   *Istanbul, Turkey*

- Maintained and implemented APIs for over 5 games in "Düşyeri" using Unity and C# skills.
- Developed reusable components for "Acenta Web" using CSS, HTML, and JS, and created an API for responding to these components in the backend using C# skills.

Software Developer Intern   July 2022 - August 2022
Webulos OG   *Hohenems, Austria*

- Contributed to over 5 projects, including "Bionic Reading App Mobile", "Rhomberg Sersa", and "Sportlichspitze" within a 2-month period.
- Developed React components and mobile versions of existing web applications using React Native.
- Participated in creating backend Rest API servers, databases, and end-to-end testing scripts using JavaScript, Node.js, Strapi, and Selenium.

PROJECTS

Acenta Web: Utilized CSS, HTML, JavaScript, and C# to develop reusable datatable components for a banking application, enhancing data visualization and user experience.

Bionic Reading App Mobile: Developed a time-efficient mobile version of the Bionic Reading App using React Native during an internship.

Düşyeri: Enhanced and maintained APIs for existing games to collect data, utilizing C# and Unity for efficient data acquisition and integration.

Rhomberg Sersa: Created a desktop application using React and Electron with a Strapi database to showcase products offline by downloading missing files when online.

Sahaya: Developed a project that offers a group finder based on user location and room creation with additional features like email notifications and money transactions using React JS, Node JS, and Sequelize skills.

Selfservis: Developed a robust backend interface application using Python with the FastAPI web framework and MySQL database. This application was designed to streamline and automate various scripts across different distributed systems, enhancing efficiency and reliability.

Sportlichspitze: Built a reusable cloud notification and email system using Firebase and Rest API for mobile applications.

EXTRACURRICULAR ACTIVITIES

Sabancı University - Debate Club Organization Manager
Awards: "Finalist Trophy" and "Creativity Reward"

- Organized 2 national and 1 international debate tournaments.

- Served as the head of the IT department for 3 national and 2 international tournaments, and hosted websites using Heroku for these events.
