Dear Mr. Dirk Maiwert,

I am writing to express my interest in the Web Developer position at Datamints GmbH, as advertised. With a Bachelor's degree in Computer Science from Sabanci University complemented by hands-on internship experience in software development and a passion for web technologies, I am excited about the opportunity to contribute to Datamints' innovative projects.

During my internships, I honed my skills in developing robust technical solutions and automating processes. For instance, at Vodafone Telecommunication, I implemented critical scripting automation that enhanced network reliability. At Cmos Technology, I maintained and implemented APIs for gaming applications, demonstrating my proficiency in closely related fields.

I am particularly drawn to the dynamic environment at Datamints and the opportunity to work on B2B and B2C Shopware projects. Although my primary expertise lies in languages such as JavaScript, ReactJS, and Python, I am eager to immerse myself in Shopware and have consistently proven my ability to adapt to new frameworks quickly. My solid foundation in database management, my understanding of object-oriented programming, and my experience in Agile development methodologies will allow me to make a meaningful contribution to your team.

My proactive nature and commitment to continuous learning, coupled with my involvement in organizing and managing tech-related aspects of university debate club events, have equipped me with excellent project management and teamwork skills.

I am excited about the possibility of bringing my experience, ideas, and enthusiasm to Datamints GmbH. I am confident that my active participation in your team would result in mutual growth and success.

Thank you for considering my application. I am looking forward to the opportunity to discuss how my background, skills, and enthusiasms align with the goals of Datamints GmbH.

Sincerely,
Ahmethan Özcan
